Notes:

- Unless otherwise indicated, data relate to non-seasonally adjusted statistics. In addition to the developments for August 2015, this press release incorporates minor revisions to the data for previous periods. The annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities, they are not affected by the impact of any other changes which do not arise from transactions.
- A complete set of updated securities issues statistics is available on the "Monetary and financial statistics" pages of the Statistics section of the ECB's website <http://www.ecb.europa.eu/stats/money/securities/html/index.en.html> and a subset is visually presented in "Our statistics" at <http://www.euro-area-statistics.org>. These data, as well as euro area data in accordance with the composition of the euro area at the time of the reference period, can be downloaded using the ECB's Statistical Data Warehouse (SDW). The tables and charts accompanying this press release are also available in the reports section of the SDW (<http://sdw.ecb.europa.eu/reports.do?node=1000002753>).
- The next press release on euro area securities issues will be published on 11 November 2015.

1) "Short-term" debt securities comprise securities that have an original maturity of one year or less, even if they are issued under longer-term facilities. Debt securities with a longer original maturity, with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates are classified as "long-term".

2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

4) Monthly averages of the transactions during this period.

5) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

- 1) Corresponding ESA 2010 sector codes: "MFIs" (including the Eurosystem) comprises the ECB and the national central banks of the euro area (S.121), as well as deposit-taking corporations except the central bank (S.122); "financial corporations other than MFIs" comprises other financial intermediaries, except insurance corporations and pension funds (S.125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127) and insurance corporations (S.128); "non-financial corporations" (S.11); "central government" (S.1311); "other general government" comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).
- 2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.
- 3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.
- 4) Monthly averages of the transactions during this period.
- 5) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) Corresponding ESA 2010 sector codes: "MFIs" (including the Eurosystem) comprises the ECB and the national central banks of the euro area (S.121), as well as deposit-taking corporations except the central bank (S.122); "financial corporations other than MFIs" comprises other financial intermediaries, except insurance corporations and pension funds (S.125), financial auxiliaries (S.126), captive financial institutions and money lenders (S.127) and insurance corporations (S.128); "non-financial corporations" (S.11); "central government" (S.131); "other general government" comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

2) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).
