- **11 Feb:** Eurosystem's response to the EBA and ESMA's public consultation on the principles for benchmark-setting processes in the EU
- **21 Feb:** Press release: ECB discloses details on securities holdings acquired under the Securities Markets Programme

Financial market sentiment – equity markets

Global positive momentum keeps pace but risk sentiment in the euro area dented by a number of country-specific events

Bank funding

Bn EUR

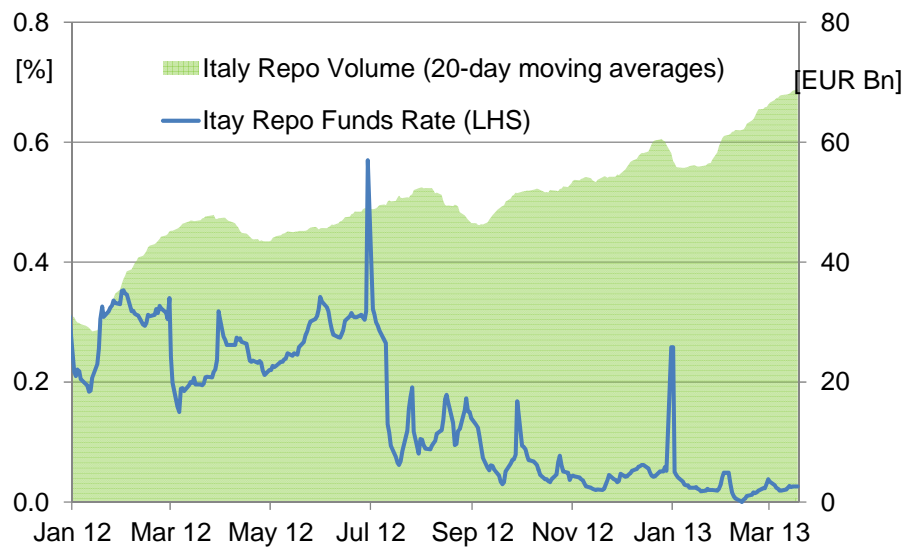

Euro area financial issuance rebounded in January reflecting improved market access, also for the non-core countries

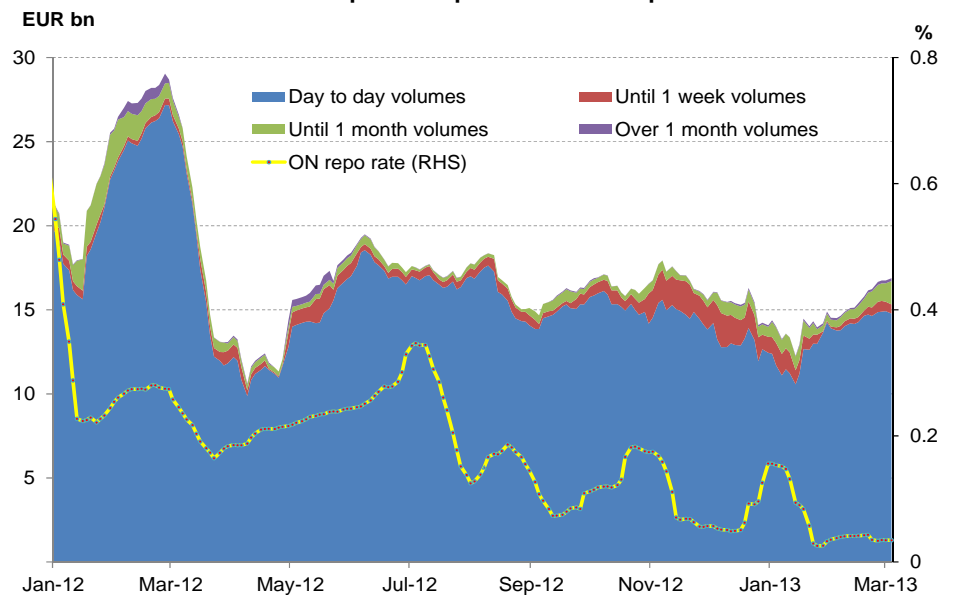

Note: all issuances with issuance volumes > EUR 100 million, Source: Dealogic
MMCG

Money market conditions - repo

Italian repo market developments (RepoFunds)

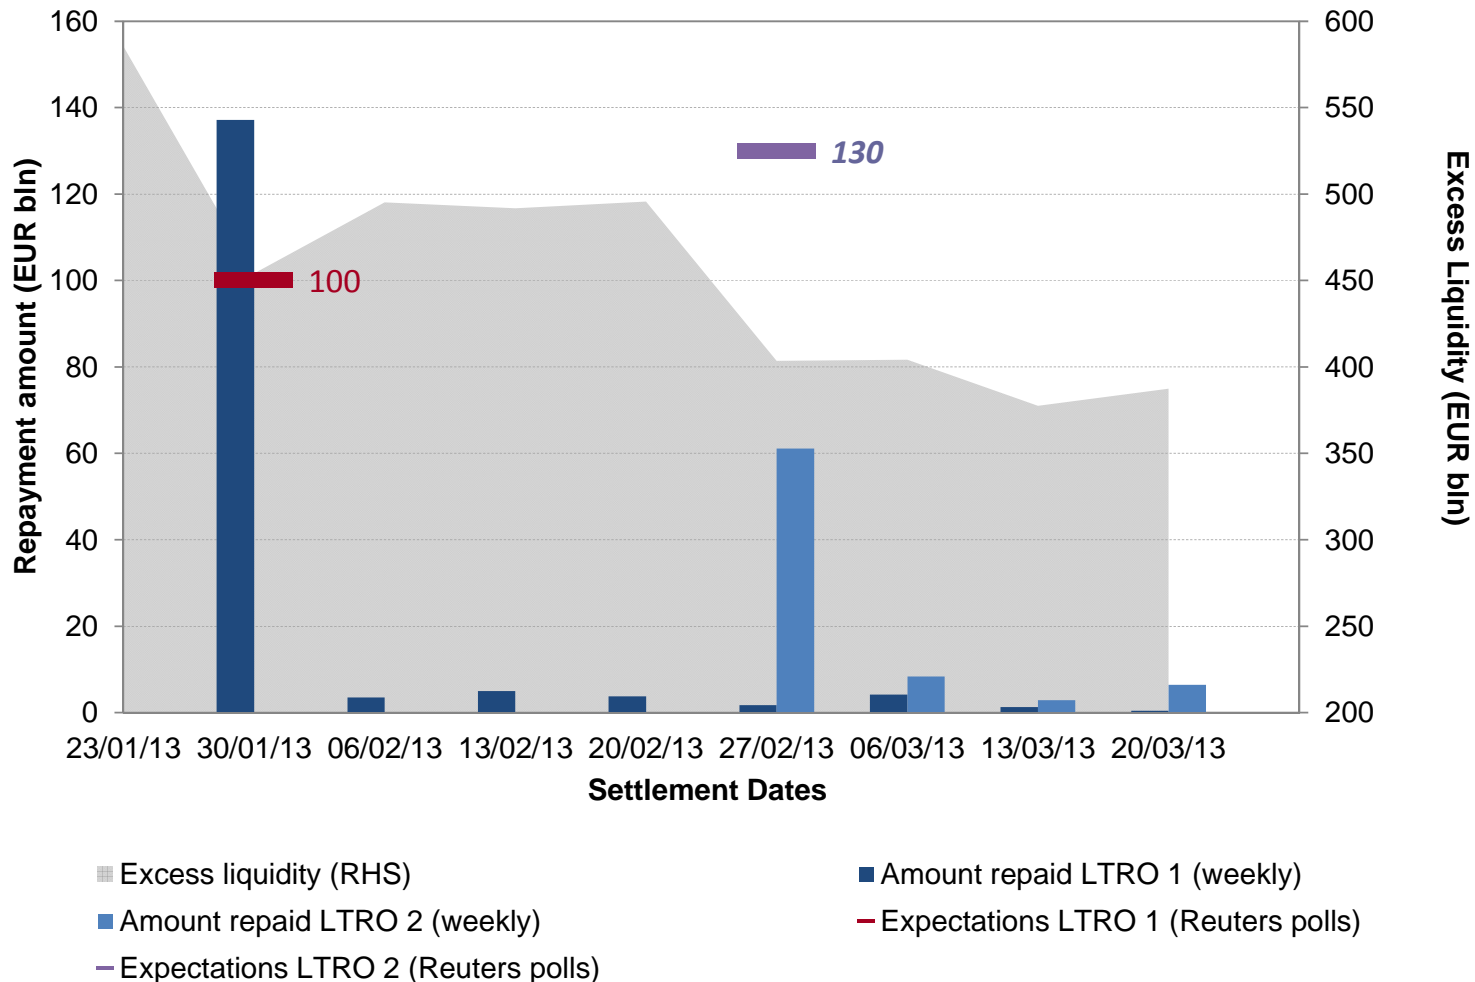

Spanish repo market developments

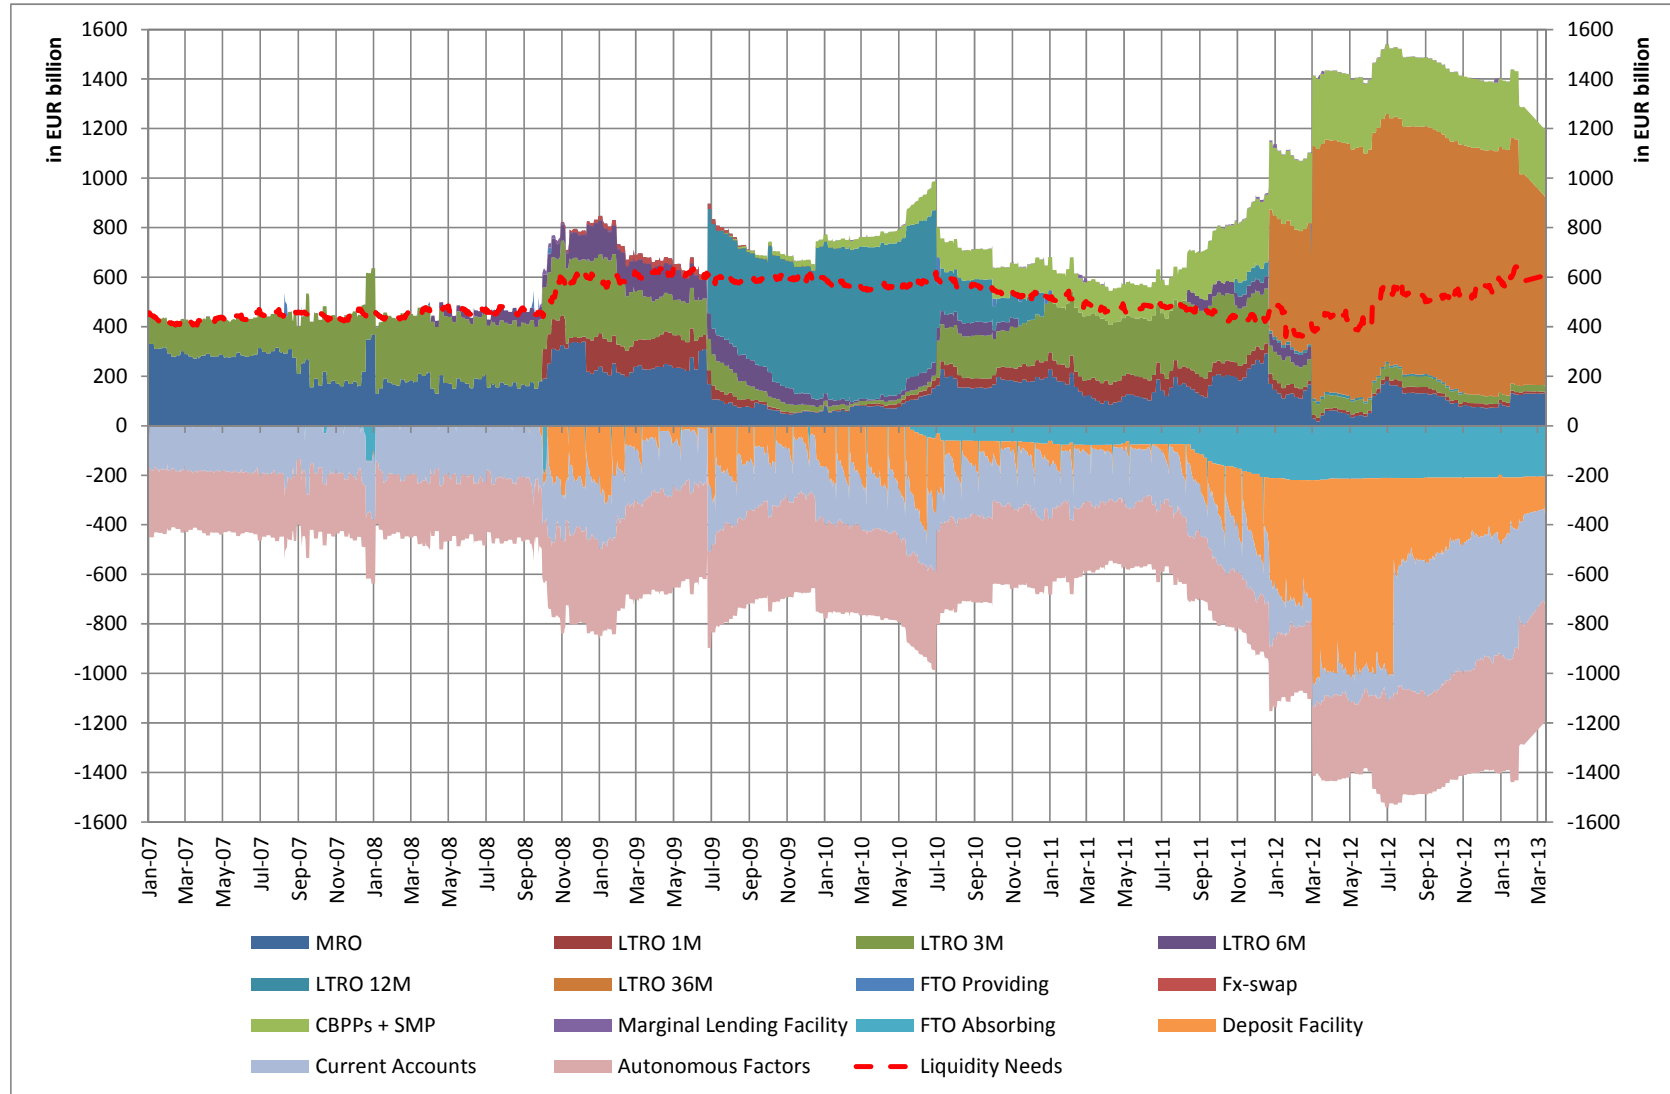

Repo market volumes rose since January and so far were little affected by a recent increase in market uncertainty

3-year LTRO repayments and excess liquidity

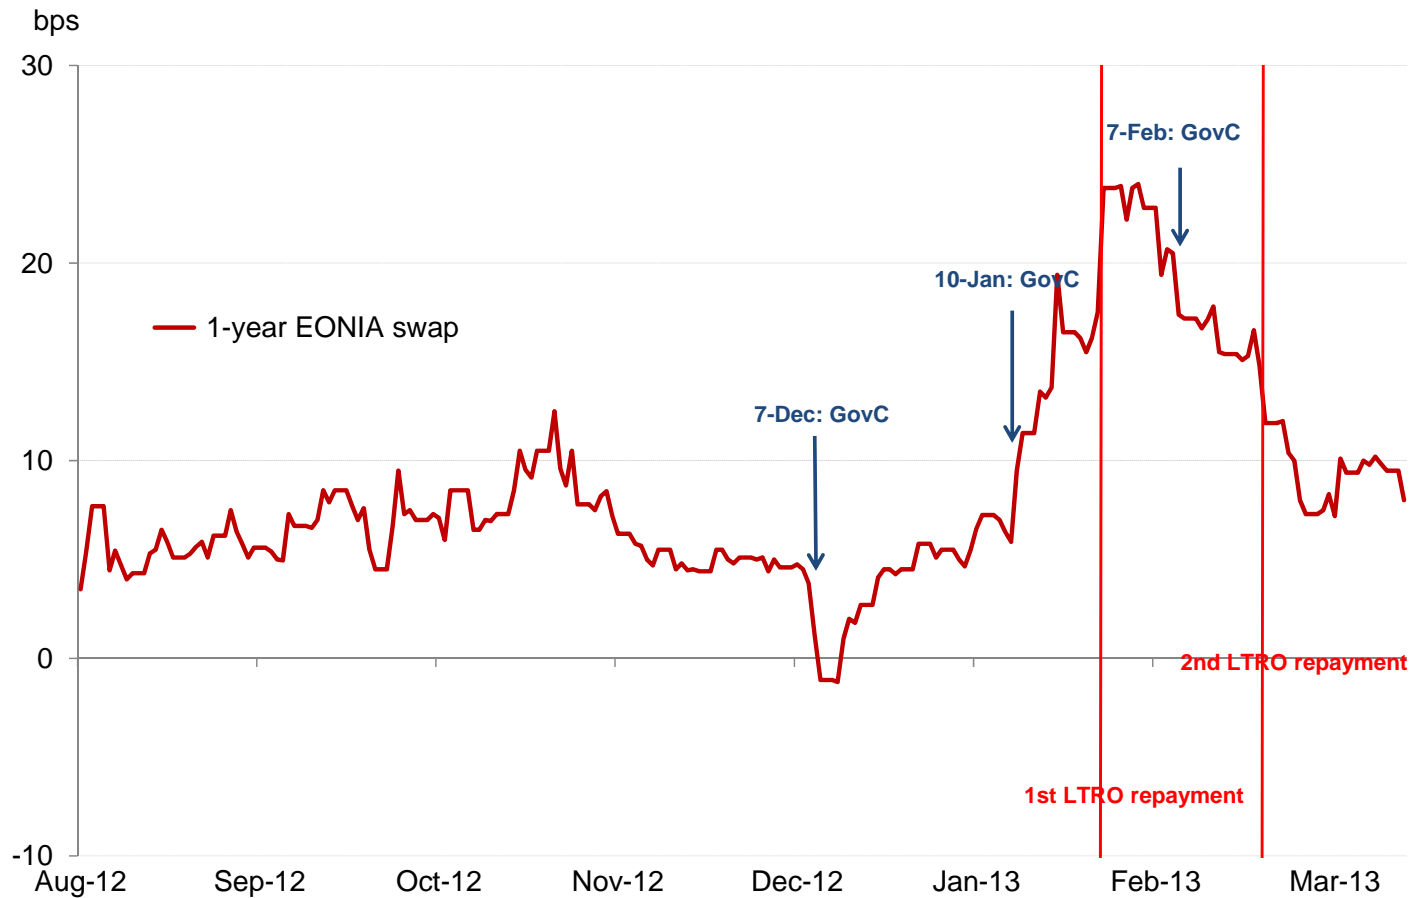

- Repayments amounted totally to EUR 236 bn (EUR 157 bn + EUR 79 bn)
- 23.8% of the total borrowings and 40.3% of the excess liquidity

ECB liquidity breakdown

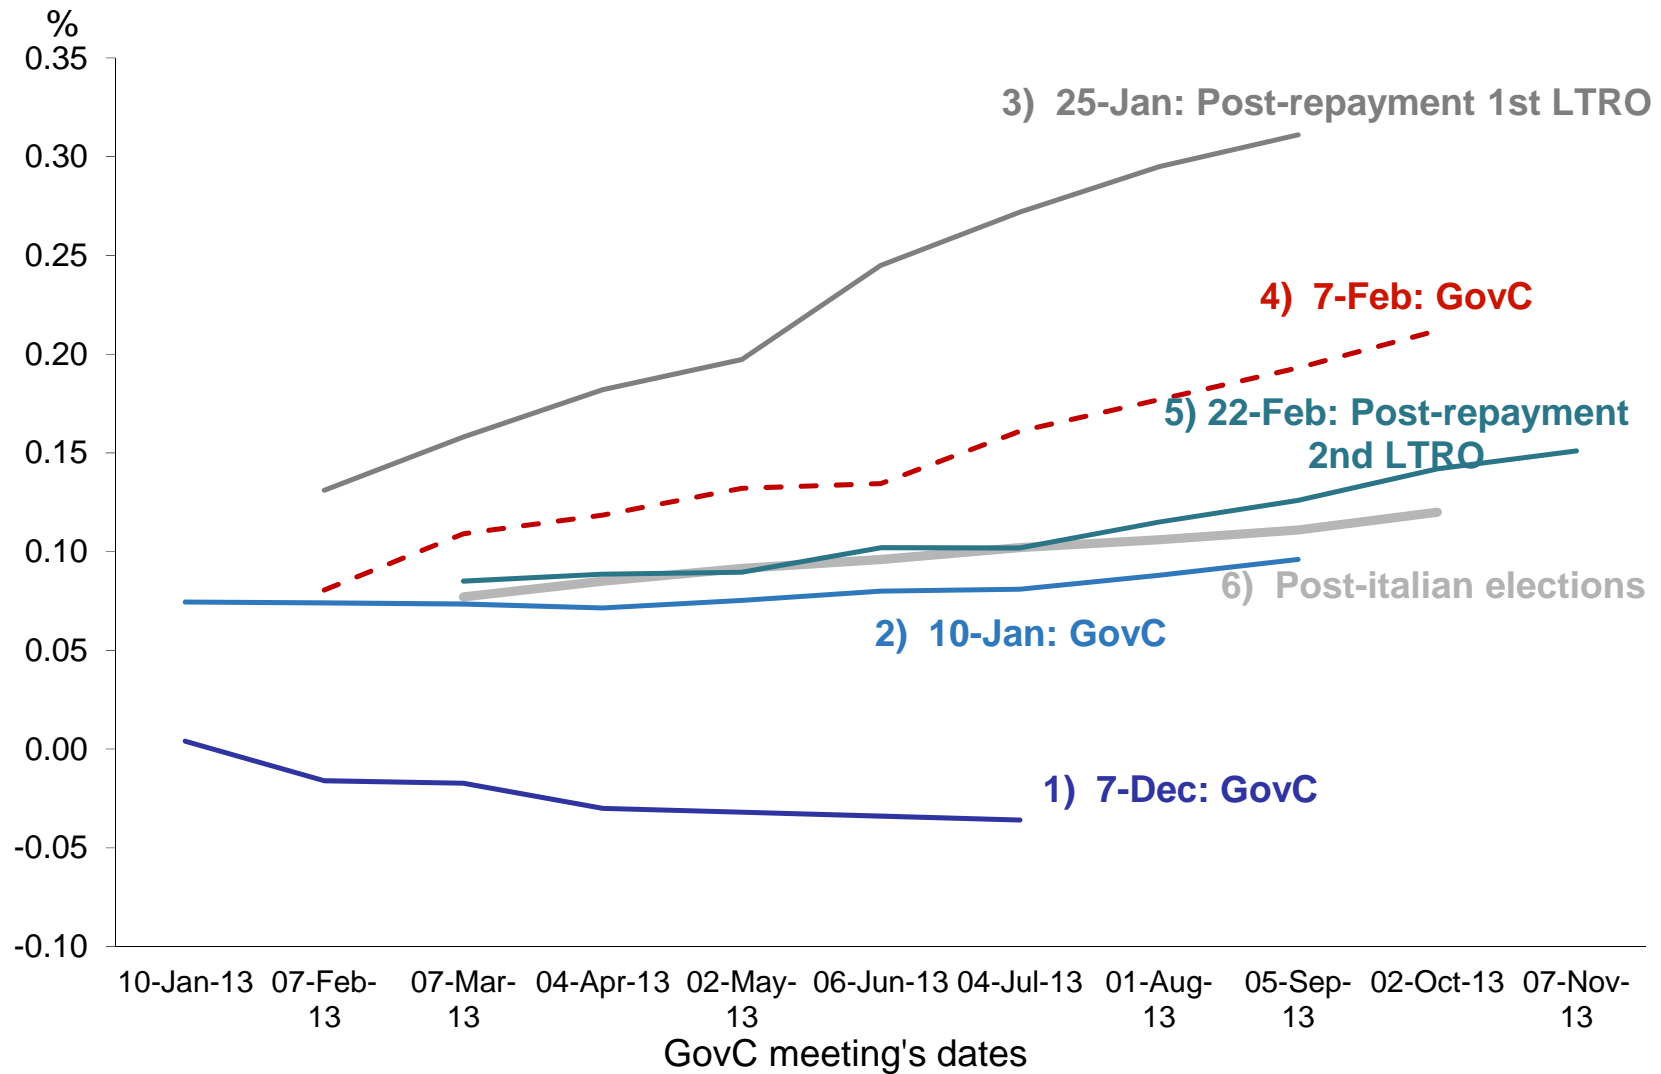

EONIA swap rates

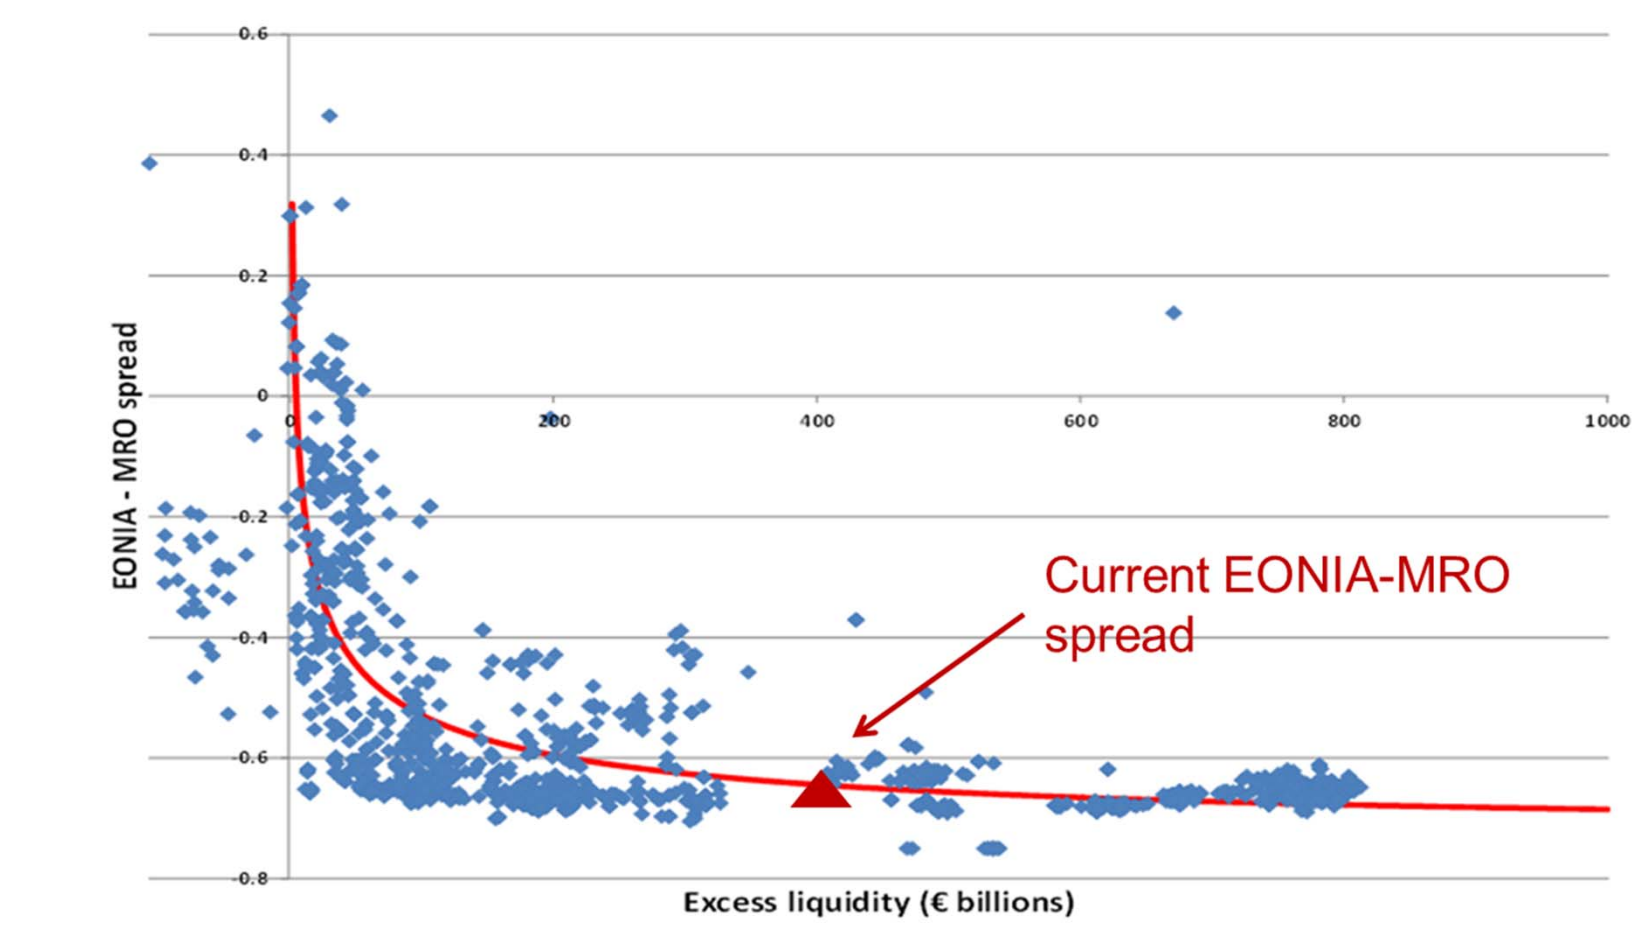

Re-pricing of market expectations with regard to monetary policy and excess liquidity resulted in high volatility of the EONIA swap rates

Eonia Forward rates

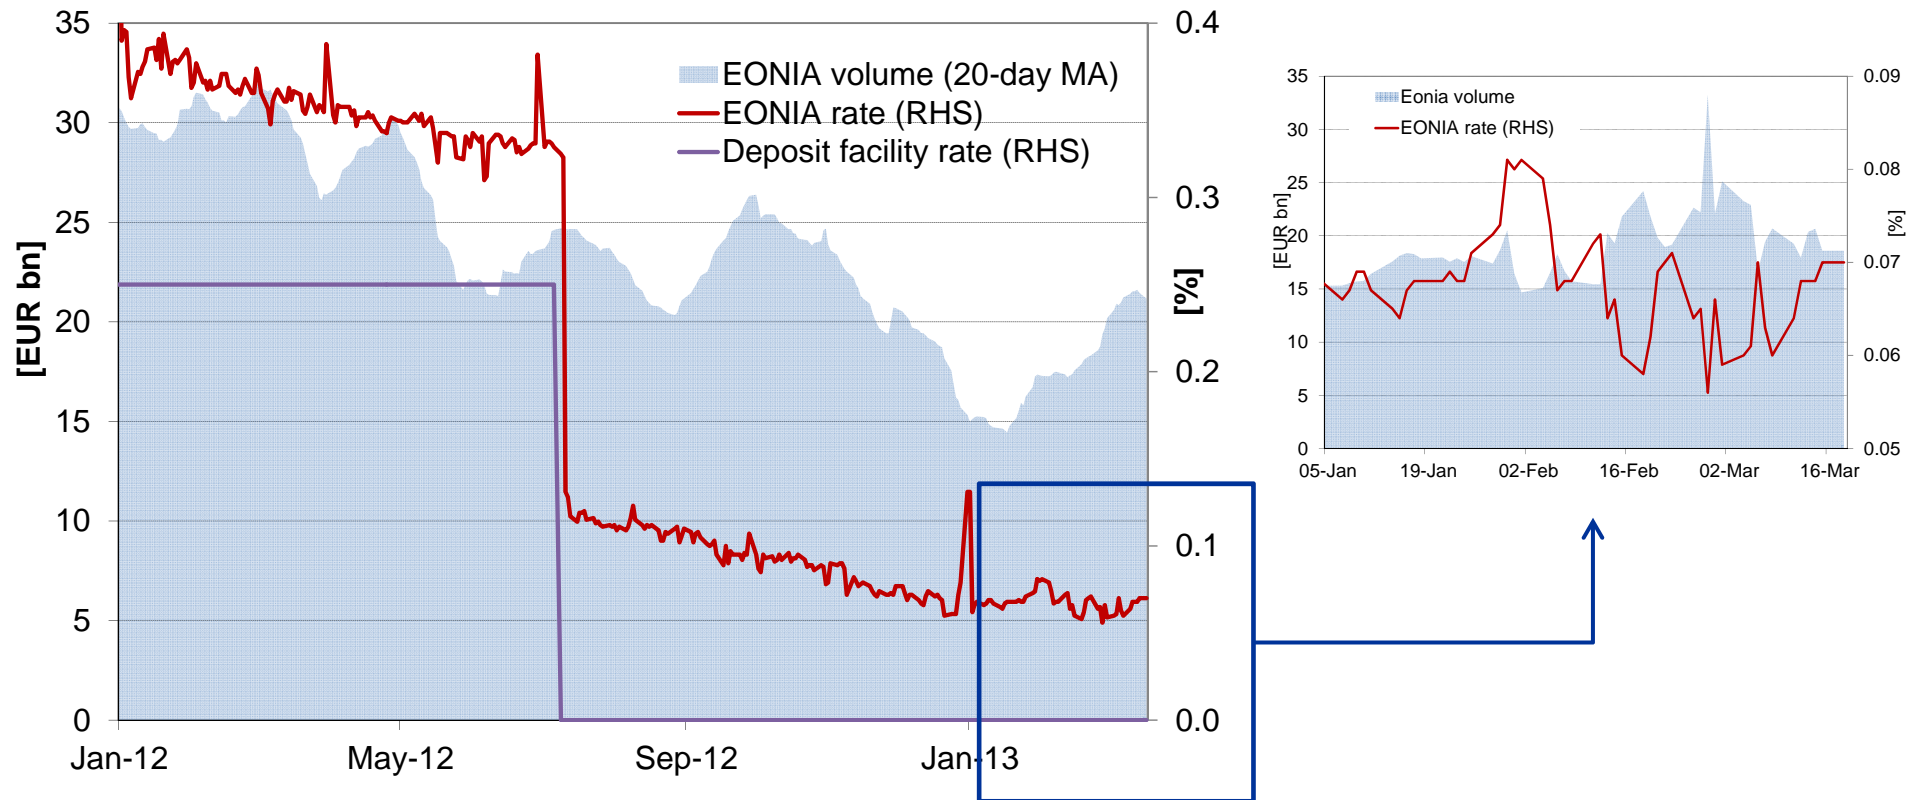

EONIA - MRO spread and excess liquidity

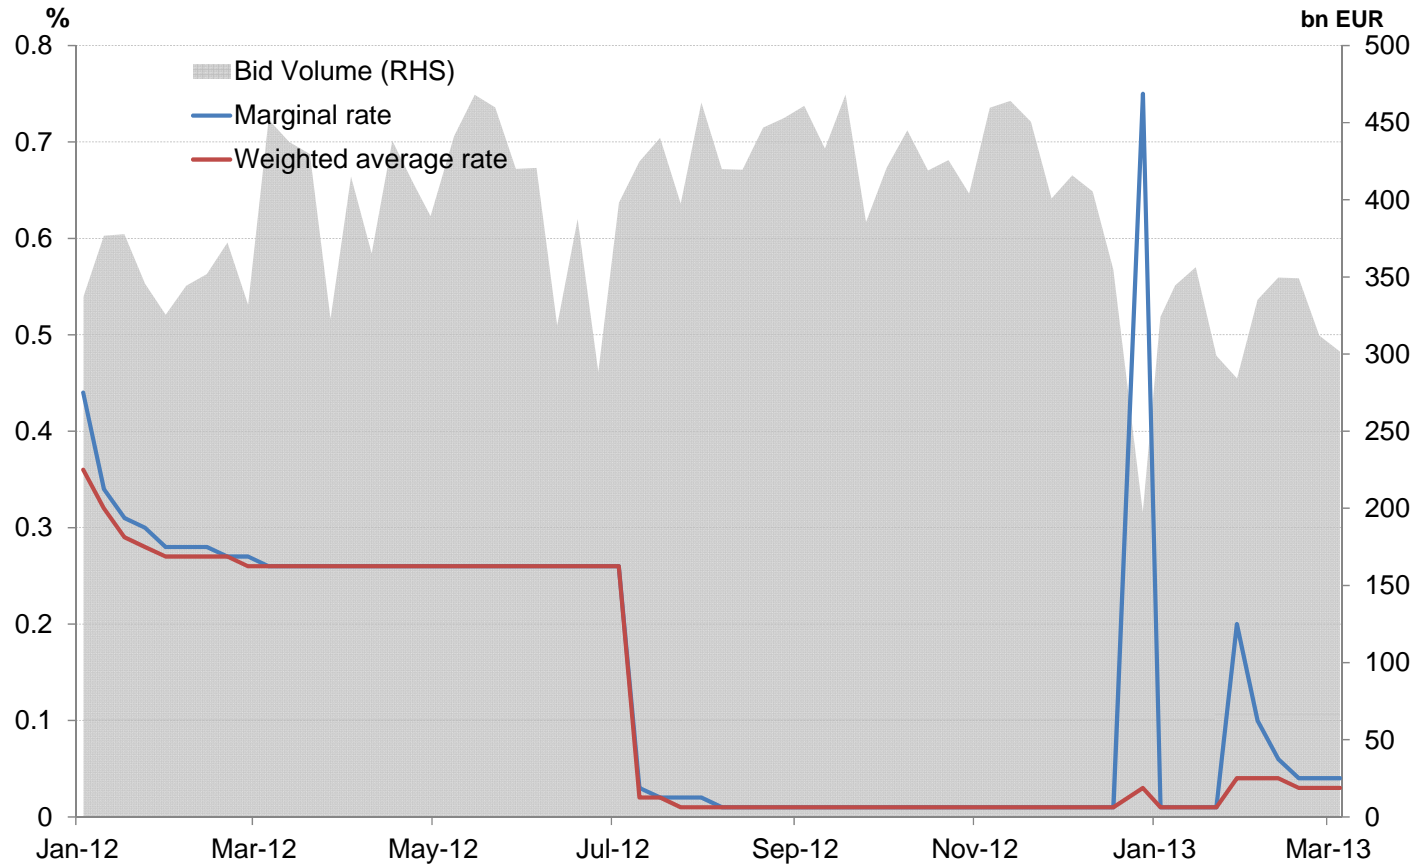

Current EONIA levels are broadly in line with the empirical relationship of the EONIA rate and the level of excess liquidity

EONIA rates and volumes

EONIA volumes started to recover amid higher volatility of EONIA rates

Re-pricing of central bank liquidity absorbing operations

Marginal and weighted average rates in the 1-week liquidity absorbing operations rose reflecting a lower amount of excess liquidity

Issues for discussion

- Market view on the 3-year LTRO repayments:
 - main drivers of the repayment?
 - market expectations of future repayments, their impact on the level of excess liquidity and money market rates?
- Improvement in the money market sentiment:
 - A self-sustained momentum?
 - Segmentation and cross-border flows?
- MMCG expectations with regard to the ECB monetary policy:
 - Standard and non-standard policy measures?
