SCoREBOARD

Triparty Collateral Management – H1 2021

Swiss NSG

The Single Collateral Management Rulebook for Europe (SCoRE) contains 17 Standards related to triparty collateral management (published as the AMI-SeCo Standards for Triparty Collateral Management). Implementation progress is monitored twice per year. This summary report presents the results of the H1 2021 monitoring exercise conducted by the Swiss NSG with the involvement of the following stakeholders:

- 1 TPA – SIX SIS

There is one TPA monitored in the Swiss market

The SCoRE Overview provides a high-level summary of the H1 2021 monitoring exercise.

SCoRE Overview

	Response Rate	Implementation Status	Milestones achieved?	Implemented on Time?
TPA - SIX SIS	100%	Implemented 0% Analysis started 0% Implementation started 34.2%	No	Yes

Note: Implemented on Time reflects the entity's expected ability to achieve the final milestone on time.

This NSG summary report is structured as follows: The Executive Summary provides an overview of the responses. Section 1 presents the compliance status of each entity type. Section 2 provides an overview of the progress against the individual milestones. Section 3 then provides a more detailed overview of the implementation status per Standard for each entity type.

Executive Summary

The Swiss market is in a special condition for being a non EU country

The CH NSG has a special starting position in the sense of being an EU third country, with a CHF (not T2S settlement currency) and euro access for Swiss market participants is usually not directly via the ECB.

TPA – SIX SIS

Nevertheless, new set-up of the TPA will include all standardised functionalities of ECB within its "Standard Triparty Collateral Management" service until November 2021.

Implementation date for the ISO 20022 messages is under discussion

The new ISO 20022 standard for triparty Swift MT's will be taken up after this date, it is currently not analysed. The potential implementation date of November 2022 is under discussion but not yet agreed.

CCPs

CCPs are monitored in their role as users of Triparty Collateral Management Service

CCPs are monitored in their role as users of Triparty Collateral Management Services so they are assessed on their ability to communicate with their TPA using ISO 20022 messaging.

The implementation of the standards and the discussion of the timeline goes in parallel with SIX SIS as TPA and SIX x-Clear as CCP.

This is valid for the implementation of the standards and its compliance monitoring process. SIX x-Clear will be involved by H2 2021 monitoring, based on its service discussions with SIX SIS as TPA.

Milestones expected to be achieved in the current reporting period are highlighted in blue in the header of Table B below. The blue colour-code is then assigned to those milestones which have been successfully achieved to date for each respective entity. Milestones which will only be achieved later are assigned a yellow status, while milestones which will only be achieved with significant delays / where work has not yet commenced are marked in red.

For the remaining milestones (i.e. milestones due to be achieved only after the current reporting cycle) the colour-code indicates an entity's expected ability to achieve a future milestone on time. The expected date of achievement is also indicated in the table if it is different to the milestone date defined by AMI-SeCo.
