

PRESS RELEASE

EURO AREA SECURITIES ISSUES STATISTICS: OCTOBER 2002

In October 2002, euro area residents issued debt securities amounting to EUR 589.1 billion (see Table 1 and Chart 1). As redemptions totalled EUR 549.8 billion, net issuance amounted to EUR 39.2 billion. Euro-denominated debt securities accounted for 93% of the total gross issuance by euro area residents. The largest proportion, accounting for 66% of the euro-denominated debt securities, was issued by Monetary Financial Institutions (see Table 2 and Chart 2). The remaining issuance activity was shared between general government, accounting for 20%, and non-monetary financial corporations and non-financial corporations, together accounting for 14%.¹

Chart 1 – Total gross issuance of debt securities by euro area residents (EUR billions, transactions during the month, nominal values)

Source: ECB Securities Issues Statistics.

Chart 2 – Total gross issuance of euro-denominated debt securities by sector of the issuer (as a percentage of the total, based on transactions during the month, nominal values)

¹ The sector classification is based on the ESA 95 (sector codes in brackets): Monetary Financial Institutions, which include central banks (S.121) and other monetary financial institutions (S.122); non-monetary financial corporations, which comprise other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); general government, which refers to the central government (S.1311) and other general government, the latter comprising state government (S.1312), local government (S.1313) and social security funds (S.1314).

The annual growth rate of the amount outstanding of debt securities issued by euro area residents was 6.9% in October 2002, compared with 7.0% (revised upwards from 6.9%) in September (see Table 1 and Chart 3). The annual growth rate of the amount outstanding of *short-term* debt securities issued by euro area residents increased from 6.7% in September to 7.8% in October 2002. For *long-term* debt securities, the annual growth rate declined from 7.0% in September to 6.8% in October 2002.

As regards the issuance of euro-denominated debt securities (see Table 2 and Chart 4), the annual growth rate of the amount outstanding of debt securities issued by the *general government* continued to increase, from 5.4% in September to 5.9% in October 2002. While the annual growth rate for the *central government* increased from 4.5% in September to 5.0% in October 2002, the annual growth rate for the *other sub-sectors* of the general government declined from 30.3% in September to 28.6% in October 2002. In the *Monetary Financial Institutions (MFIs)* sector, the annual growth rate declined from 5.5% in September to 4.7% in October 2002. In the *non-MFI* corporate sector, the annual growth rate of the amount outstanding declined from 17.7% in September to 16.7% in October 2002. Within this sector, the annual growth rate of the amount outstanding of euro-denominated debt securities issued by *non-monetary financial corporations* declined from 33.1% in September to 30.9% in October 2002. For *non-financial corporations* this growth rate declined from 6.4% in September to 5.9% in October 2002.

Chart 3 – Debt securities issued by euro area residents by original maturity (annual percentage changes based on nominal end-of-period stocks)

Chart 4 – Euro-denominated debt securities issued by euro area residents by sector of the issuer (annual percentage changes based on nominal end-of-period stocks)

1) Data coverage for euro area residents is estimated at around 95% of total issuance.

2) Including items expressed in the national denominations of the euro.

3) "Short-term" means securities with an original maturity of one year or less (in accordance with the ESA 95, in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more one year away, or with indefinite maturity dates, are classified as long-term.

4) Rates of change are calculated from amounts outstanding and are not adjusted for revaluations, reclassifications or other changes which do not arise from transactions.
