PRESS RELEASE

EURO AREA SECURITIES ISSUES STATISTICS: JUNE 2006

The annual growth rate of the outstanding amount of debt securities issued by euro area residents decreased from 7.8% in May 2006 to 6.7% in June. This decrease was partially caused by a base effect within the monetary financial institutions sector. For the outstanding amount of quoted shares issued by euro area residents, the annual growth rate was 1.1% in June 2006, compared with 1.2% in May.

Issuance of **debt securities** by euro area residents totalled EUR 826.9 billion in June 2006 (see Table 1 and Chart 1). As redemptions came to EUR 799.3 billion, net issues amounted to EUR 27.6 billion. The annual growth rate of outstanding debt securities issued by euro area residents decreased from 7.8% in May 2006 to 6.7% in June (see Table 1 and Chart 2). This decrease was partially caused by a base effect within the monetary financial institutions sector.

As regards the sectoral breakdown, the annual growth rate of outstanding debt securities issued by non-financial corporations increased from 4.2% in May 2006 to 4.5% in June (see Table 2 and Chart 3). For the monetary financial institutions sector, this growth rate decreased from 10.0% in May 2006 to 8.0% in June. The annual growth rate of outstanding debt securities issued by non-monetary financial corporations decreased from 26.6% in May 2006 to 24.4% in June. For the general government, this growth rate decreased from 3.2% in May 2006 to 2.5% in June.

As regards the maturity breakdown, the annual growth rate of outstanding short-term debt securities decreased from 8.8% in May 2006 to 6.2% in June (see Table 1 and Chart 2). For long-term debt securities, the annual growth rate decreased from 7.7% in May 2006 to 6.7% in June. The annual growth rate of outstanding fixed rate long-term debt securities decreased from 4.3% in May 2006 to 3.8% in June. The annual growth rate of outstanding variable rate long-term debt securities decreased from 17.4% in May 2006 to 14.4% in June.

Concerning the currency breakdown, the annual growth rate of outstanding euro-denominated debt securities decreased from 7.1% in May 2006 to 5.8% in June. For debt securities in other currencies, this growth rate decreased from 14.6% in May 2006 to 14.3% in June (see Table 1).

The seasonally adjusted three-month annualised growth rate of outstanding debt securities decreased from 8.6% in May 2006 to 6.5% in June (see Table 3 and Chart 5). For non-financial corporations, the

seasonally adjusted three-month annualised growth rate of outstanding debt securities decreased from 10.5% in May 2006 to 7.2% in June.

Issuance of **quoted shares** by euro area residents totalled EUR 8.8 billion in June (see Table 4). As redemptions came to EUR 2.4 billion, net issues amounted to EUR 6.5 billion. The annual growth rate of quoted shares issued by euro area residents (excluding valuation changes) was 1.1% in June 2006, compared with 1.2% in May (see Table 4 and Chart 6). The annual growth rate of quoted shares issued by non-financial corporations was 1.0% in June 2006, the same as in May. For monetary financial institutions, it was 1.5% in June 2006, compared with 1.6% in May. For non-monetary financial corporations, this growth rate decreased from 2.1% in May 2006 to 1.3% in June.

The outstanding amount of quoted shares issued by euro area residents totalled EUR 5,376 billion at the end of June 2006. Compared with EUR 4,381 billion at the end of June 2005, this represents an annual increase of 22.7% in the value of the stock of quoted shares in June 2006, down from 25.6% in May.

Unless specified otherwise, data relate to non-seasonally adjusted statistics. In addition to the developments for June 2006, this press release incorporates minor revisions to the data for previous periods. Securities issues statistics and explanations can be accessed via the "Money, banking and financial markets" pages of the "Statistics" section of the ECB's website (<http://www.ecb.int>). The data can be downloaded in the form of charts (pdf files) or as csv files and are updated monthly.

Source: ECB securities issues statistics.

1) Data coverage for euro area residents is estimated to be around 95% of total issuance.

2) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

4) Monthly averages of the transactions during this period.

5) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

Source: ECB securities issues statistics.
1) Data coverage for euro area residents is estimated to be around 95% of total issuance.
2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); non-monetary financial corporations comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.131); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).
3) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).

1) Corresponding ESA 95 sector codes: MFIs refers to other monetary financial institutions (S.122); non-monetary financial corporations comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11).

2) Monthly averages of the transactions during this period.

3) The annual percentage change is the change in the value of the amount outstanding at the end of the preceding period, compared with the value at the end of the same period 12 months earlier.

4) Annual growth rates are based on transactions that occur during the period and therefore exclude reclassifications and any other changes which do not arise from transactions.
