## PRESS RELEASE

## EURO AREA ECONOMIC AND FINANCIAL DEVELOPMENTS BY INSTITUTIONAL SECTOR - FOURTH QUARTER 2012

In the fourth quarter of 2012, the annual growth rate ${ }^{1}$ of households' gross disposable income turned negative ( $-0.6 \%$ ) after a slightly positive growth ( $0.1 \%$ ) in the third quarter (see Table 2). The annual growth rate of households' consumption expenditure was $0.4 \%$ in the fourth quarter compared with $0.2 \%$ in the previous quarter. Reflecting these developments the annual growth rate of households' gross saving decreased to -7.7\%, compared with $-1.1 \%$ in the third quarter of 2012. The household gross saving rate ${ }^{2}$, decreased to $12.8 \%$, compared with $13.2 \%$ in the fourth quarter of 2011.

The annual growth rate of households' financing increased to 0.9\% (2012q3: 0.6\%) and that of financial investment remained broadly unchanged, at 1.6\% (2012q3: 1.7\%). Households' net worth ${ }^{3}$ remained unchanged (annual growth rate 0.0\%) as in the previous quarter.

The annual growth rate of net entrepreneurial income of non-financial corporations decreased
$-0.9 \%$ in the fourth quarter from $3.1 \%$ in the previous quarter. The annual growth rate of gross fixed capital formation of non-financial corporations decreased to -3.7\% in the fourth quarter of 2012, from $-3.0 \%$ in the third quarter of 2012 (see Table 3). The annual growth rate of financing of non-financial corporations remained broadly unchanged, at 1.0\% (2012q3: 1.1\%) and that of their financial investment remained broadly unchanged as well, at 1.7\% (2012q3: 1.8\%).

[^0]
## Total euro area economy

Euro area net disposable income increased at an annual rate of $0.2 \%$ in the fourth quarter of 2012 compared to $1.4 \%$ in the third quarter (see Chart 1 and Table 1). The euro area gross fixed capital formation annual growth rate decreased further to -4.0\% (2012q3: -3.5\%), due to negative contributions by all non-financial sectors (see Chart 2). In the fourth quarter, the growth rate of gross capital formation increased to $-5.1 \%$ from $-6.3 \%$ previously (see Chart 3). The continued decline in gross capital formation accompanied by unchanged euro area savings led to a continued, but slower, growth of net lending by the euro area to the rest of the world (corresponding to an increase in the current and capital account surplus).

## Households

The annual growth rate of households' gross disposable income decreased to $-0.6 \%$ in the fourth quarter of 2012 (from $0.1 \%$ previously), which was mainly due to the negative effect of increasing taxes that was only partly offset by an increase in the compensation of employees (see Chart 4 and Table 2).

The annual growth rate of households' consumption expenditure increased to $0.4 \%$ from $0.2 \%$ in the previous quarter, whilst that of households' gross saving decreased to $-7.7 \%$ compared with $-1.1 \%$ in the previous period. The households' gross saving rate ${ }^{2}$ decreased to $12.8 \%$, as compared with $13.2 \%$ in the fourth quarter of 2011. The annual growth rate of gross fixed capital formation of households was $-2.6 \%$ in the fourth quarter (2012q3: -2.8\%).

Households' gross non-financial investment declined at an annual rate of $-3.6 \%$, compared with $-4.2 \%$ in the previous quarter while growth of financial investment remained broadly unchanged at 1.6\% (2012q3: 1.7\%). The decline in total investment was matched by a decline in gross savings and a broadly unchanged rate of loan financing (see Chart 5). The annual growth rate of total financing of households increased to $0.9 \%$ in the fourth quarter of 2012 (2012q3: 0.6\%).

Turning to the components of households' financial investment, the annual growth rate of their holdings of currency and deposits increased to $3.5 \%$ (2012q3: 3.0\%). The annual growth rate of their investment in debt securities was $-9.0 \%$, down from $-0.3 \%$ in the third quarter, and that of investment in shares and other equity increased to $1.5 \%$ (2012q3: $0.6 \%)$. The annual growth rate of households' additions to life insurance and pension fund reserves increased to 2.2\% (2012q3: 1.8\%).

Developments in households' balance sheets reflected the negative valuation changes of non-financial assets, mainly due to a further decline of housing wealth, for which the annual growth rate remained broadly unchanged ( $-3.2 \%$ after $-3.1 \%$ previously) (see Chart 6 and

Table 2). This was almost completely offset by positive valuation changes of financial assets. The annual growth rate of the market value of households' holdings of shares and other equity increased to $7.4 \%$, compared to $6.8 \%$ previously. Households' net worth remained unchanged (annual growth rate $0.0 \%$ ) as in the previous quarter (see Chart 6). The household debt ratio, that is the outstanding amount of loans as percentage of households' gross disposable income, decreased to $98.7 \%$, compared to $99.0 \%$ in the fourth quarter of 2011 (see Table 2).

## Non-financial corporations

Net entrepreneurial income ${ }^{4}$ of non-financial corporations decreased (-0.9\%) after growing (3.1\%) previously (see Chart 7 and Table 3). The annual growth rate of net value added remained at zero, as in the previous quarter. The annual growth rate of gross fixed capital formation of non-financial corporations declined further to $-3.7 \%$ in the fourth quarter of 2012, down from $-3.0 \%$ in the previous quarter. The annual growth rate of total gross nonfinancial investment, which also includes inventories, decreased to -8.0\% compared with $7.8 \%$ in the previous quarter (see Chart 8). Net lending (+)/net borrowing (-) of nonfinancial corporations as a percentage of gross value added increased to 0.4\% (2011q4: $0.9 \%$ ) (see Table 3).

In the fourth quarter of 2012, the annual growth rate of financing of non-financial corporations remained broadly unchanged, at $1.0 \%$ (2012q3: 1.1\%). The annual growth rate of their loan financing decreased to $-0.2 \%$, from $1.0 \%$ in the previous quarter. The annual growth rate of their equity financing, via the issuance of quoted and unquoted shares and other equity, remained unchanged at $1.6 \%$. The issuance of debt securities increased to $12.9 \%$ (2012q3: $12.1 \%$ ), driven by a $14.3 \%$ increase in the issuance of long-term debt securities.

Financial investment of non-financial corporations increased at an annual rate of $1.7 \%$ in the fourth quarter, broadly unchanged from $1.8 \%$ previously. The annual growth rate of currency and deposits increased to $3.6 \%$, after $0.6 \%$ previously and that of debt securities decreased to $0.4 \%$ in the fourth quarter (2012q3: 5.1\%). The growth rate of loans granted decreased to $3.3 \%$ in the fourth quarter of 2012 (2012q3: 6.6\%) and that of investments in shares and other equity decreased to $1.2 \%$ (2012q3: $1.5 \%$ ).

## Insurance corporations and pension funds

The annual growth rate of insurance technical reserves, the major financing instrument of insurance corporations and pension funds, increased to $2.4 \%$ in the fourth quarter of 2012

[^1](2012q3: $2.0 \%$, see Table 6), and the annual growth rate of their financial investment increased to $3.6 \%$ (2012q3: 2.5\%). The growth rate of their investment in debt securities increased to $4.3 \%$ (2012q3: 3.0\%), whilst their investment in shares and other equity increased to $4.0 \%$, from $3.2 \%$ in the previous quarter.

## Notes

- The annual growth rate of non-financial transactions and of outstanding financial assets and liabilities (stocks) is calculated as the percentage change between the value of the transaction or outstanding amount for a given quarter and that value recorded four quarters earlier. Let $X_{t}$ be the level of a non-financial transaction or end-of-quarter stock, then its annual percentage change $g\left(x_{t}\right)$ is calculated as:

$$
g\left(x_{t}\right)=\frac{\left(x_{t}-x_{t-4}\right)}{x_{t-4}} * 100
$$

- The annual growth rate used to analyse financial transactions refers to the total value of transactions during the year in relation to the outstanding stock a year before. These growth rates for financial transactions exclude the effect on the outstanding stock of revaluations, reclassifications, and further changes that do not arise from transactions. When $f_{t}$ represents the value of transactions in a particular financial instrument, and $F_{t}$ represents the value of the corresponding stock outstanding at the end of quarter t , then the annual growth rate $\mathrm{g}\left(f_{t}\right)$ is calculated as the sum of the transactions during the year divided by the outstanding stock a year ago:

$$
g\left(f_{t}\right)=\left(\sum_{i=0}^{3} f_{t-i} / F_{t-4}\right) * 100
$$

- The euro area accounts encompass integrated non-financial and financial accounts, including financial balance sheets. They are jointly compiled by the ECB and the European Commission (Eurostat), in close cooperation with the national central banks and the national statistical institutes in the EU. ${ }^{5}$ The European sector accounts follow the methodology of the European System of Accounts 1995 (ESA 95). ${ }^{6}$ A detailed set of quarterly data is published in Tables 3.1-3.5, "Euro area accounts", of the statistics section of the ECB's Monthly Bulletin. Net lending for households and non-financial corporations may differ between the non-financial and the financial accounts reflecting statistical discrepancies.
- This press release incorporates revisions for the third quarter of 2012 and for previous quarters.
- A comprehensive set of tables is made available at http:I/sdw.ecb.europa.eu/reports.do?node=1000002343 (ECB). The time series for the euro area accounts can be downloaded from the ECB's Statistical Data Warehouse.
- The publication of euro area economic and financial developments in the first quarter of 2013 is scheduled to take place on Tuesday, 30 July 2013 at 10 a.m. CET.

1) Annual percentage changes are calculated as $100 *(x(t)-x(t-4)) / x(t-4)$ where $x(t)$ stands for the transaction $x$ in quarter $t$, and $x(t-4)$ for the transaction four quarters earlier.
2) Households and non-profit institutions serving households.
3) Transfers of goods and services by government units and non-profit institutions serving households (NPISHs) to individual households.
4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).

## Sources: ECB and Eurostat.

1) Households and non-profit institutions serving households.
2) Annual percentage changes are calculated as $100 *(x(t)-x(t-4)) / x(t-4)$ where $x(t)$ stands for the transaction or end-of-quarter stock $x$ in quarter $t$, and $x(t-4)$ for the transaction or stock four quarters earlier.
3) Net adjustment for the change in net equity of households in pension fund reserves (receivable - payable).
4) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
5) Annual growth rates for financial transactions are calculated as $100 *(f(t)+f(t-1)+f(t-2)+f(t-3)) / F(t-4)$ where $f(t)$ stands for the transactions in quarter $t$, and $F(t-4)$ for the end-of-quarter stock value four quarters earlier.
6) Loans granted, prepayments of insurance premiums and reserves for outstanding claims and other accounts receivable.
7) Financial derivative's net liabilities, pension fund reserves and other accounts payable.

## Table 3. Non-financial corporations

(EUR billions)

Sources: ECB and Eurostat.

1) Annual percentage changes are calculated as $100^{*}(x(t)-x(t-4)) / x(t-4)$ where $x(t)$ stands for the transaction or end-of-quarter stock $x$ in quarter $t$, and $x(t-4)$ for the transaction
or stock four quarters earlier.
2) As a percentage of net value added in the case of net entrepreneurial income and net saving.
3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
4) Annual growth rates for financial transactions are calculated as $100 *(f(t)+f(t-1)+f(t-2)+f(t-3)) / F(t-4)$ where $f(t)$ stands for the transactions in $q u a r t e r t$, and $F(t-4)$ for the
end-of-quarter stock value four quarters earlier.
5) Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
6) Other accounts payable, financial derivative's net liabilities and deposits.

Sources: ECB and Eurostat.

1) Annual percentage changes are calculated as $100 *(x(t)-x(t-4)) / \mathrm{x}(\mathrm{t}-4)$ where $\mathrm{x}(\mathrm{t})$ stands for the transaction or end-of-quarter stock x in quarter t , and $\mathrm{x}(\mathrm{t}-4)$ for the transaction or stock four quarters earlier.
2) As a percentage of net value added in the case of net entrepreneurial income and net saving
3) Changes in inventories, acquisitions less disposals of valuables and acquisitions less disposals of non-produced non-financial assets (e.g. land).
4) Annual growth rates for financial transactions are calculated as $100 *(f(t)+\mathrm{f}(\mathrm{t}-1)+\mathrm{f}(\mathrm{t}-2)+\mathrm{f}(\mathrm{t}-3)) / \mathrm{F}(\mathrm{t}-4)$ where $\mathrm{f}(\mathrm{t})$ stands for the transactions in quarter t , and $\mathrm{F}(\mathrm{t}-4)$ for the end-of-quarter stock value four quarters earlier.
5) Monetary gold and SDRs, other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
6) Other accounts payable and financial derivative's net liabilities

1) Annual growth rates for financial transactions are calculated as $100 *(f(t)+f(t-1)+f(t-2)+f(t-3)) / F(t-4)$ where $f(t)$ stands for the transactions in quarter $t$, and $F(t-4)$ for the end-of-quarter stock value four quarters earlier
2) Other accounts receivable, and prepayments of insurance premiums and reserves for outstanding claims.
3) Other accounts payable and financial derivative's net liabilities.
4) Annual percentage changes are calculated as $100 *(x(t)-x(t-4)) / x(t-4)$ where $x(t)$ stands for the transaction or end-of-quarter stock $x$ in quarter $t$, and $x(t-4)$ for the transaction
or stock four quarters earlier.

[^0]:    I The euro area accounts are expressed in current prices and they are not seasonally adjusted. The (nominal) growth rates are presented as year-on-year percentage changes (see the notes).
    ${ }^{2}$ The household saving rate is based on four-quarter cumulated sums of both their saving and their gross disposable income (adjusted for the change in net equity of households in pension fund reserves, receivable minus payable).
    ${ }^{3}$ Households' non-financial assets mainly consist of housing wealth (residential structures and land). In addition, they also include non-financial assets of unincorporated enterprises classified within the household sector.

[^1]:    ${ }^{4}$ Net entrepreneurial income is broadly equivalent to current profits in business accounting (after the receipt and payment of interest and including the profits of foreign subsidiaries, but before the payment of income taxes and dividends).

[^2]:    5 See http://ec.europa.eu/eurostat/sectoraccounts (Eurostat) for the non-financial accounts of the EU.
    6 For more details, see http://forum.europa.eu.int/irc/dsis/nfaccount/info/data/esa99/en/titelen.htm.
